

What we are Building ?

At Dash Dot Robotics, we're not just developing technology; we're creating a retail revolution. Our focus is on delivering end-to-end solutions that transform conventional stores into completely autonomous Dot Stores. With our cutting-edge robotics technology, we have the power to convert any ordinary store into a self-sustaining Dot Store. Users can interact seamlessly through our mobile app or strategically placed kiosks, placing orders that our advanced technology autonomously picks, packs, and delivers, all the way to the checkout station. Say hello to the future of retail - where we empower businesses to embrace innovation and turn their stores into autonomous shopping hubs.

DOT Store

How does it Help?

Grocery buyers

- Time-saving benefits with quick and automated order , packing and checkout.
- Easy access to nearby dot stores located in high residential areas with higher footfall.
- Availability of groceries and essential medicines 24/7.

Store Owners

- Dot stores require less floor space, resulting in a low initial investment.
- Elimination of human labor, shifts, staff management, and other operational tasks.
- Fully autonomous store operations, including automatic ordering of replenishment stocks without human involvement.
- High return on investment (ROI) and the ability to run multiple stores by a single person.
